CHANGES TO OUTSTANDING ORDERS COMPONENT
11.21.22

Summary

The outstanding orders component has previously been pulling in information that is not helpful when viewing the component in the workflow MPages. This cluttered view has lead to information being hard to find within the component.

Key Points

As of **11.21**, this component will **ONLY** be available on the **Ambulatory Workflow**. Inpatient Providers can still view all information from the Order Profile Component.

The following catalog types will be removed from view:

Evaluation and Management

Procedures

POC Basic

Referral

Pharmacy

The component will be removed from the following workflows:

Dermatology Inpatient Workflow

Women's Health – OBGYN Inpatient

Women's Health – GYN Inpatient
